# FLOOD ANGEL® FLASH FLOOD DOORS - BENEFITS

## Environmentally Friendly Material

---

### Material

Flood Angel Flash Flood Doors are manufactured from lead free UPVC, which can be recycled without any need for special treatment or separate collection.

## Energy Conservation

---

### Weather Sealed

A combination of the use of innovative materials with thoughtful design, has proved our door to be not only the best for flood resistance, but also excellent in protecting against severe weather.

### Thermal Performance

Flood Angel® Flash Flood Door exceeds the Industry Standard thermal performance levels which are set by Building Regulations and the British Board of Agreement, due to their extra wall thickness and multi-chamber construction.

## Technical Performance

---

### Steel Reinforcement

Flood Angel Flash Flood Doors are manufactured with steel reinforcement for maximum strength, durability and security.

### Impact Resistance

Flood Angel Flash Flood Doors are produced using high impact profiles, with mechanically welded mullions and transoms, offering superior impact resistance under extreme conditions.

### Unique locking device

The unique multi locking and sealing features of Flood Angel Flash Flood Doors provides excellent flood resistance and a outstanding performance in respect of draught and noise exclusion.

### Flood Resistance

Flood Angel Flash Flood Doors carry a full Kitemark licence having been tested to the BSI Flood Protection Kitemark standard PAS 1188-1 2009.

## Superior Passive Flood Performance

---

Passive flood protection products are those which do not need any form of manual intervention to deploy. Flood Angel Flash Flood Doors, once properly locked and activated can be relied on to protect your property even when you are not at home.

Our doors look like and work like a normal UPVC door but their unique locking system ensures that they will remain flood resistant, keeping your property safe from flood water until the treat has passed and the door can be unlocked and opened in the normal way.

# PRODUCT RANGE
